2026-2027 Tuition Discount Policy

Tuition discounts by agent vary by nationality, as shown below.

Nationality	Maximum Discount
Korean	No discounts allowed
Japanese, Taiwanese, and Chinese	Up to 5% of total tuition
Vietnamese, Mongolian, Thai, and Indonesian	Up to 10% of total tuition
Middle Eastern Nationals	Determined by the office representative based on timing and circumstances

- *Discounts are based on the nationality listed on the student's passport, not on their country of residence.*
- *The 'Total Tuition' above does not include the admission fee.*

1. When a promotion is available, the tuition discount will be calculated after the promotional amount has been deducted from the total tuition.

> ***Tuition Discount for Japanese Nationals: Example***
>
> - *Tuition is $1,500. If the school is offering a $100 promotion,*
> - *1,500 - 100 = $1,400*
> - *The maximum tuition discount for Japanese nationals is **5%.** The discount would be $70, which is 5% of $1,400.*
> - *Therefore, 1,400 - 70 = $1,330. The final tuition amount presented to the student must be $1,330 or higher.*

2. Agents may offer their own promotions (including tuition discounts or equivalent benefits). However, the calculation of such discounts must follow the method outlined in above.

3. Students who receive discounts beyond the policy limit may be expelled, even after enrollment. Please be cautious of excessive discounts.

4. Agents who violate the policy will face escalating penalties: a two-week suspension for the first violation, a one-month suspension and commission downgrade for the second, and permanent suspension for the third.
